Healthy eating

Eurest is made up of a team of professionals who develop menus taking into account the needs of each age group.

Every day, children will be able to choose from a variety of nutritionally balanced dishes prepared with fresh, high quality ingredients under the strictest quality control standards.

The everyday lunch service includes the following items:

Salad bar with 6 varied vegetables

Appetizer

2 Main Courses with side dishes

1 Vegetarian Main Course

Grilled chicken or beef steak

Special dish or sandwiches

Variety of desserts which include fruit and light desserts

Iced tea jars, whole and/or skimmed milk or yogurt

Special diets recommended by a pediatrician or other specialist can be prepared when required.

Nutritional Education

Forming suitable eating habits at an early age assures a nutritionally healthy adult.

One feature which separates our company from the rest is the presence of a Monitor in the cafeteria. This person is a qualified nutritionist who provides the link between the food service staff and the child's best nutritional education.

The Monitor's basic function is to help the students:

-  Get to know the different types of food and their ingredients.
-  To assist students in food selection so that they are exposed to a variety of different dishes.
-  To discover new foods.
-  To emphasize the importance of good hygiene.

Special treats for your children

We assume that children and teenagers receive a well-balanced diet if they are eating small amounts of nutritious, high energy food at regular intervals throughout the day. Therefore, we have come up with a Fruit Kiosk where natural fruit drinks such as smoothies or milk-shakes will be offered daily (mid-morning and mid-afternoon) to contribute to the students' overall energy intake during the school day.

These natural beverages are ideal because they lower the children's appetite and anxiety between breakfast, lunch, and dinner. In addition, these drinks play an important role in maintaining the Glycemic index (GI) steady, providing energy toward cognitive activities.

Ice-cream on Fridays

We will give homemade ice-cream cones on Fridays for all the students. All children (and most adults!) enjoy a wholesome treat every so often.

“EAT-LEARN-LIVE”

Compass Group intends to offer much more than just a balanced diet for school children through its Eurest brand in Argentina. Defining the concept in just one word is impossible, so we use three: Eat, Learn, & Live. Each of them has a specific meaning but altogether they encompass what we would like to express: to help students learn to live active, healthy lives.

HSEQ (Quality, Health and Safety, and Environment)

We have set global HSEQ policies and standards that demonstrate our focus on quality, environmental performance and labour health and safety.

All standards are complemented with procedures and training courses.

Standard work guidelines have been established by Group Technical Services for the following items:

-  Crisis Management.
-  Food Safety.
-  Occupational Health and Safety.
-  Supply Chain.

We have been certified ISO 9001:2000 for Good Manufacturing Practices, Food Safety and Hygiene, and have also implemented an Environmental Management System based on ISO 14001 international standards.
